

Please amend the claims as follows:

1. (Currently Amended) A method for managing access to a service comprising the steps of: (A) delegating to a recipient one or more permissions relating to said service via a delegation device wherein said delegation device comprises a global positioning system receiver for determining a location of said delegation device at a time said delegation of one or more of said permissions occurs and wherein said delegating comprises binding the location and the permission to a public key of the recipient; and (B) using said location to control access to the service.

2. (Original) The method of claim 1 wherein step (B) comprises revoking one or more of said permissions delegated at said location.

3. (Original) The method of claim 1 wherein the service comprises accessing content.

4. (Original) The method of claim 1 wherein the service comprises actuating a device.

5. (Original) A method for monitoring delegation information comprising the steps of: (A) delegating one or more permissions to a recipient via a delegation device wherein said delegation device comprises a global positioning system receiver for determining a location of said delegation device at a time said delegation of one or more of said permissions occurs wherein said delegating comprises binding the location and the permission to a public key of the recipient; and (B) using said location to monitor delegation information.

6. (Original) The method of claim 5 wherein step (B) is performed in connection with marketing objectives.

7. (Original) The method of claim 5 wherein step (B) is performed in connection with legal requirements.

8. (Currently Amended) A system for managing access to a service comprising: a delegation device that delegates one or more permissions relating to said service via a delegation device to a recipient wherein said delegation device comprises a global positioning system receiver for determining a location of said delegation device at a time said delegation of one or more of said permissions occurs and wherein said delegation comprises binding the location and the permission to a public key of the recipient; and one or more servers that use said location to control access to the service.

9. (Original) The system of claim 8 wherein said one or more servers are used to revoke one or more of said permissions delegated at said location.

10. (Original) The system of claim 8 wherein the service comprises accessing content.

11. (Original) The system of claim 8 wherein the service comprises actuating a device.

12. (Currently Amended) A system for monitoring delegation information comprising: a delegation device that delegates one or more permissions via a delegation device to a recipient wherein said delegation device comprises a global positioning system receiver for determining a location of said delegation device at a time said delegation of one or more of said permissions occurs and wherein said delegation comprises binding the location and the permission to a public key of the recipient; and one or more servers that use said location to monitor delegation information.

13. (Original) The system of claim 12 wherein the one or more servers use said location in connection with marketing objectives.

14. (Original) The system of claim 12 wherein the one or more servers use said location in connection with legal requirements.
